

THE NATURAL
OASIS

A branch with several green leaves is positioned in the upper left corner of the frame. The leaves are vibrant green with some yellowing at the edges, suggesting sunlight. The branch and leaves cast soft, elongated shadows onto a light-colored, textured wall that serves as the background. The overall lighting is warm and natural, creating a serene and organic atmosphere.

WHO WE ARE

For over 40 years, Juhayna has been a trusted leader in the dairy and juice industry, delivering premium, nutritious products to consumers around the world. With a legacy of quality, innovation, and customer satisfaction, we've built a brand that stands for excellence. Our commitment to sustainable practices and high standards has allowed us to grow and thrive, making us a household name in both the dairy and juice sectors.

In 2008, we expanded our expertise into agriculture, launching Enmaa for agricultural development and livestock, focused on cultivating and exporting the finest crops. By combining traditional farming techniques with cutting-edge technology, we ensure that our fresh produce meets the highest quality standards. Today, we proudly supply fresh, premium citrus fruits to international markets, continuing our tradition of providing exceptional products to our customers.

Employees +4000

Apply the highest quality methods to produce

1 MW

Solar power Station to reduce carbon footprint

vision AND mission

mission

vision

Vision

To be Egypt's leading global exporter of premium fresh produce, renowned for quality, sustainability, & innovation.

Mission

Deliver exceptional fresh produce to international markets, ensuring quality and sustainability while fostering innovation & growth.

AGRICULTURE FARMS

Today, **Enmaa** is growing into a full-fledged agricultural entity that produces highest quality citrus and crops for both local and international markets, stretching on a landbank exceeding **10,000 acres** and aiming to expand exponentially within the coming two years , our farms are located at loamy soil

of **Al Farafra** and **Al Bahariya oasis**. **Enmaa** is now ready to be a leading grower in the fresh produce sector as our lands offer a variety of high-quality standard crops.

LIVESTOCK FARM

On 600 Acres we have our livestock farm with total Herd now 7,500 heads reaching a total herd of 14,000 by the year 2027, in parallel with reclaiming 2000 acres annually to have enough ground to raise our cattle for milk production.

SUSTAINABILITY

SUSTAINABLE DEVELOPMENT GOALS

As the fresh produce industry continues to evolve, with increasing demand for organic, free pesticide and sustainable produce, ENMAA invests in sustainable cultivation practices and innovative digital marketing strategies to engage directly with consumers.

Irrigation and soil control system, we have an online satellite live irrigation, soil and disease control. this fully automated system gives us immediate data for irrigation and water optimum utilization for our crops, illustrating our strong strategy and role for the environmental sustainability for controlling water footprint level.

Solar power station One of the milestones in the company's history since its establishment is the opening of the first solar station selling electricity to the private sector from solar energy, with a capacity of 1 MW. The station is the first of its kind in Egypt, as it contributes to saving the consumption of about 600 thousand liters of diesel annually and avoiding the emission of about 1.62 thousand tons of carbon dioxide annually, noting that the entire project is run by solar energy to preserve the environment illustrating our strong strategy and role for the environmental sustainability.

FARM MANAGEMENT

DACOM SOFTWARE SYSTEM

FARM HYGIENE AND QUALITY STANDARDS,

Keeping the technical and industrial background in our minds, we apply the latest and most comprehensive cultivation and harvest technologies, irrigation systems and systematic diseases controlling in agriculture. With a full supervision from our technical engineers and constant training to many workers in our

farms, we make sure that every piece of fruit is reaped with the best technique and by the most qualified expertise, in today's rapidly evolving food processing industry, ensuring the safety and sustainability of agricultural sourcing has become more crucial than ever, our quality team procedures

FARM QUALITY PROCEDURES

To produce a free pesticide Citrus

- 1-Regular monitoring and testing of soil and water quality to ensure optimum growth conditions.
- 2-Implementing Integrated Pest Management (IPM) practices to minimize the use of pesticides and prevent pest infestations.
- 3-Strict adherence to food safety protocols and hygiene practices during harvesting, transportation, and processing.
- 4-Traceability and Quality checks and controls at every stage of the supply chain
- 5-Detect and eliminate potential contaminants or deviations from the set standards.
- 6-Establishing traceability systems to track the origin and journey of agricultural products, facilitating swift recalls if necessary
- 7-Enhancing food safety measures is vital in agricultural sourcing to safeguard consumer health.
- 8-Implementing sustainable farming practices promotes environmental responsibility and long-term viability.
